environmental

Content

The fibre composition in the product is virgin fibres

Material

Virgin fibre

Virgin pulp fibres are produced out of softwood or hardwood. The process is either sulphite or sulphate delignification, meaning that e.g. lignins and resins are removed from cellulosic material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Wetstrength agent

Dry strength agent

Dye

Fixing agents

Fluorescent whitening agent

Glue

Softeners

The process chemicals are:

Antipitch

Protection agent

Food Contact

This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by ISEGA. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Fulfilment of essential requirements: Yes
Concentration of heavy metals: the sum of Cd, Pb, Hg, Cr6 <: 100 ppm

Environmental label = Ecolabel

This product does not have an ecolabel

Date of issue 2006-06-12

Revision date 2011-09-02 2011-04-11

Production

This product is produced at Suameer mill, NL
Suameer mill is certified according to ISO 14001 and EMAS.

Disposal / destruction of used product

This product is mainly used for industrial processes and might through use be contaminated with different substances. This will determine how the used product will be handled / disposed of /destroyed. The product itself is suitable for
