

Microfibre Cloth Training Guide

High cleaning standards reduce the risk of cross infection...

1

Select the correct colour coded cloth for your cleaning task

2

Place cloths into bucket of solution or dip single cloth in solution

3

Remove cloth from water

4

WRING THOROUGHLY

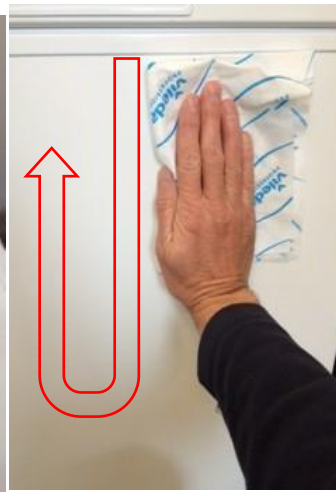

5 take cloth keeping it folded

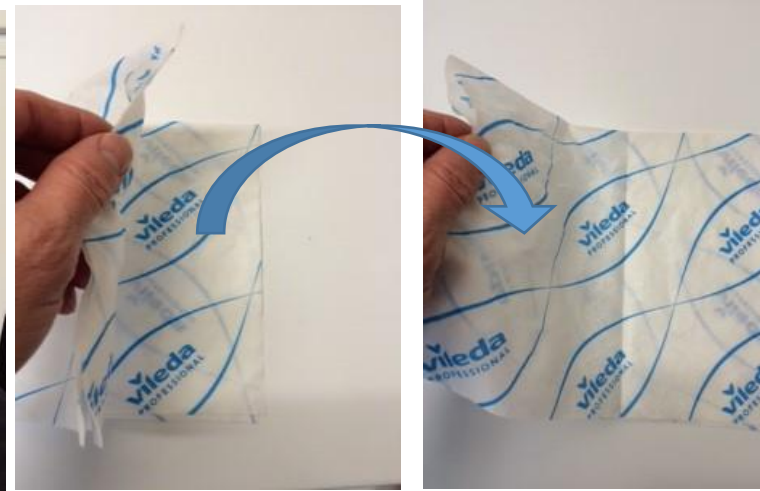

Wipe using over lapping method

6

Start at the top and work down using a single side

7

After wiping first surface, turn over cloth, repeat so all 8 sides are used

8

Cloth then goes to waste

Vileda Professional Wiping Method Statement

Wiping general areas - bathrooms - bodily spillages

- Wearing gloves
- Fill 6 litre bucket with water and correct dilution of chemical if required and select the correct colour coded cloth for your cleaning task
- Pre soak a number of cloths in solution or dip a single cloth in solution - wring tightly so cloth is damp - keeping the cloth folded - proceed using Bics method - one side per surface as instructed in training – when all eight sides have been use dispose into waste bag or laundry net if washable
 - For general areas use Blue cloth prepared as above
 - Bathroom – use Red cloth prepared as above work from clean to dirty as per training instructions.
 - For infection out breaks or bodily spillage use Yellow cloth with appropriate chemical made to manufacturer's instruction- proceed as above.

Use eight sided method for wiping
